(54) COMPOSITE ELECTRONIC DEVICE

(57)Abstract:

PURPOSE: To provide a thin miniature composite electronic device including a plurality of capacitors having significantly different capacity employing a dielectric of different permittivity.

CONSTITUTION: Dielectrics 12, 13, 14 of different permittivity are arranged in a same layer. Capacitors 3, 4, 5 are arranged such that the dielectrics 12, 13, 14 of different permittivity are interposed between the inner electrodes 9a and 9b, 10a and 10b, and 11a and 11b of different capacitors 3, 4, 5. Consequently, a plurality of capacitors 3, 4, 5 having significantly different capacity are formed in a same layer.

LEGAL STATUS

[Date of request for examination] 03.02.1998

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3092693

[Date of registration] 28.07.2000

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
